

PRO 51 | UNIVERSAL DRILLING MACHINE

PRO 51 is a new generation magnetic drilling machine with Morse Taper No. 2

Superior features of PRO 51 include:

- compact design
- gear box and slide system made as one piece
- excellent ratio weight / power
- maintenance friendly design
- purpose designed motor with heavy duty gear box
- maintenance friendly rail guide system

Unique semi-automatic gib adjustment system (patent pending) enables simple, fast and always correct fine tuning without any expert knowledge or experience. Replaceable spline at the end of armature shaft eliminates laborious and expensive armature maintenance. Compact design allows the operator to drill very close to side wall and corners.

PRO 51 is equipped with the latest generation of electromagnetic energy saving base (ESB) with magnetic field shape control system (MFSC) and magnetic power adhesion control module (MPAC), which detects adhesive force of electromagnetic base and protects both the machine and the operator from work on too thin workpieces.
